

## Checklist

Species that have been confirmed breeding in the County are marked with an asterisk (\*).

Seasons are divided as follows:

Spring: March 15 to May 31

Summer: June 1 to August 15

Fall: August 16 to November 30

Winter: December 1 to March 14

+ irruptive species – not present every winter

++ only found when open water still present

The status of each species in the County are as follows:

**VR:** species has only been recorded a few times during migration (observations should be reported to the rare birds committee)

**R:** species not likely to be observed unless birding in suitable habitat during proper season and at right time of day, repeated visits may be necessary

**U:** species may be observed if birding in suitable habitat in proper season

**C:** likely to be seen if birding in suitable habitat

**VC:** likely to be seen everyday, widespread and abundant
